# BAY GAME

Celebrating Children & Our Natural World  
Yesterday, Today & Tomorrow

# A MESSAGE FROM GOVERNOR O'MALLEY

Welcome to the 2010 Maryland Bay Game, the 13<sup>th</sup> edition of this fun summer activity book that celebrates you and our natural world.

This year Ol' Blue and his new friend, Professor B.G. Frogswamp, take us on a trip back in time to see what life was like for kids in colonial times, before TV, video games, phones or even electricity. We can learn a lot about how to have fun from Maryland's first young citizens, who played outdoors and made up games — often using things found in nature!

Today children who spend more time outdoors are healthier, happier and even do better in school. And having fun outdoors inspires us to take better care of our planet.

As you enjoy this year's Bay Game, I hope you will be encouraged to spend more time exploring our natural world. And while you're fishing, hiking, camping or just playing in your backyard, I hope you will think about what you can do to help protect our land, water, fish and wildlife.

Have a great, safe summer!

Martin O'Malley  
Governor

# PLAYING THE GAME

The Bay Game is an activity book created especially for Maryland kids. The games, puzzles, coloring pages and activities inside are for playing and learning anytime!

While on a road trip, be sure to play Bay Bingo and the Chesapeake Bay Trust License Plate Game.

The Bay Game inspires you to be an artist or an explorer, learn fun facts and get outside and play. Let these symbols be your guide!

PLAY

EXPLORE

LEARN

COLOR

And to keep the fun going after the game is finished, keep a nature journal; write and draw about your outdoor experiences, paste in photos and keep a list of outdoor adventures you want to have in the future.

## GOOD LUCK & HAVE FUN!

This document is available in alternative format upon request from a qualified individual with a disability.

# BAY GAME FRIENDS

**OL' BLUE**

Ol' Blue is pleased to introduce his new friend, naturalist and historian, Professor B.G. Frogswamp. Like Maryland, Professor Frogswamp is very smart and very green! He also knows a lot about what kids did in colonial times, and has many fun ideas and activities to share with you in the pages that follow.

**PROFESSOR  
B.G. FROGSWAMP**  
NATURALIST & HISTORIAN

# MARYLAND CHILDREN'S OUTDOOR BILL OF RIGHTS

Every Maryland child shall have  
the opportunity to...

Discover and connect with their natural world.

Play and learn outdoors.

Splash and swim in the water.

Camp under the stars.

Follow a trail.

Catch a fish.

Watch wildlife.

Explore wild places  
close to home.

Celebrate their culture & heritage.

Share nature with a great mentor, teacher or  
parent.

*In 2008 Governor Martin O'Malley established the Maryland Partnership for Children in Nature. This coalition of state, local, private and non-profit partners — which promotes the well-being of youth by expanding opportunities for environmental learning and outdoor play — is now a national model. Learn more at*

*[www.dnr.maryland.gov/cin](http://www.dnr.maryland.gov/cin)*

# A NEW WORLD OF ADVENTURE

Imagine it is March 1634. You and your family arrive at a Chesapeake Bay island after a 4-month voyage from England. Your new home will eventually become St. Clement's Island.

Everyone helps out in the New World. If you're a girl, you probably help cook and bake, dye and weave wool, churn butter, and clean house. If you're a boy, you help plow, hoe and harvest crops, chop firewood, and learn to use a musket to hunt small game.

Even the youngest colonial children had chores, like feeding chickens, gathering eggs and harvesting vegetables.

But even though you are busy with chores, you always find time to play and explore.

YESTERDAY

## EXPLORE

Visit a Maryland farm and pick strawberries or go to an orchard and pick apples with your family. Enjoy delicious and healthy locally grown treats! Find a farm at [www.marylandagriculture.info/](http://www.marylandagriculture.info/)

# FUN WITH NATURE'S GIFTS

Colonial kids used all sorts of things found in nature as toys and games, instead of store-bought things we have today. You can too!

## PLAY

- Make a doll's head from a dried apple — poke features with a toothpick.
- Cut corn cobs into pieces to use as building blocks.
- Collect shells to use as dishes for dolls, pretty rocks to play hopscotch.
- Tie wildflowers or dandelions together for a necklace or bracelet.
- Create art with pressed flowers glued to recycled paper.
- Cut walnuts in half, paint and use as holiday ornaments.
- Hollow out a gourd and blow your own horn.
- Challenge your friends to see who can think of the most fun things to do with objects found in nature.

YESTERDAY & TODAY

# COLONIAL PLAY TIME

Colonial kids spent lots of time in nature and played games using their imaginations!

## WATCH BIRDS

Children were curious about nature when they came to the New World, and discovered new animals, birds, trees and plants.

You can attract birds to your backyard. Place mixed bird seed in a spot in your yard or on your balcony. A porch railing or outside table works well. It may take a few days, but in time birds will flock to your special place!

## BE AN ANIMAL

Pretend to be an animal, and have your friends guess what you are. Be sure to give lots of hints: Make creature sounds. Walk, crawl or run in a certain way. Pretend to eat certain foods. Act brave or shy. The first person to guess the right answer gets to be the next animal!

## PLAY SHADOW TAG

On a bright, sunny day, you and your friends can chase each others' shadows. Hiding in the shade is allowed, but only for a count of 10. The first person whose shadow is stepped on becomes the next tagger.... you're it!

# WHAT'S IN A NAME?

**Assateague** State Park is named for Assateague Indians and is Maryland's only park that sits on the Atlantic Ocean.

The **Patapsco** River is named for an Algonquin word meaning backwater or tide covered with froth. The river provided food for the Susquehannock and the Piscataway tribes, such as herring, shad, rockfish, clams, oysters, shrimp and crabs.

The **Patuxent** River was first named Pawtuxunt on Captain John Smith's 1608 map.

A Maryland city, river and state park all share the name **Pocomoke**; the Pocomokes were the first watermen, hunters, farmers and trappers on the Chesapeake Bay waters and wetlands.

The **Chesapeake Bay** gets its name from an Algonquian word believed to mean great shellfish bay.

YESTERDAY & TODAY

## EXPLORE

Check out highway signs and a map to identify other rivers, towns and parks that got their names from Native Americans.

# HARRIET TUBMAN WORD SEARCH

Araminta Harriet Greene Tubman devoted her life to fighting slavery and championing the rights of women. Known as the "Moses of her people," she was born a slave in Maryland in 1820.

In 1844, Harriet married John Tubman, who was a free man. She escaped slavery in 1849 and traveled north. She then became a conductor for the Underground Railroad and helped slaves flee to northern states and Canada.

# FARMERS

## THE FIRST ENVIRONMENTALISTS

Farmers have always cared for their land and grown their own food. Long before the term "environmentalist" was coined, farmers worked to prevent soil erosion on their farms and keep crop fields fertile to provide food for all of us to eat.

George Washington (1732-1799) worked hard to improve the soil at his Mt. Vernon farm in Virginia. He became one of the most progressive farmers of his day, experimenting with crop rotation, composting and soil conservation to keep the soil healthy.

Thomas Jefferson (1743-1826), our third president, also was a farmer, scientist and inventor. Jefferson rotated his crops, farmed on the contour of hills to reduce soil erosion, and planted cover crops to protect and enrich the soil.

Farmers today have adapted and improved the techniques Washington and Jefferson used to protect our soil and the Chesapeake Bay. Maryland farmers have planted thousands of trees on their farms, installed hi-tech manure handling systems, planted cover crops on their fields and created hundreds of acres of wetlands. These are ways farmers prevent soil and pollution from coming off the land. People also grow their own gardens and buy locally-grown fruits and vegetables to serve their families!

| Bay grasses <input type="checkbox"/>     | <input type="checkbox"/> Animals with claws and hard shells that live on the bottom of the Bay |
| Fish <input type="checkbox"/>            | <input type="checkbox"/> Bugs that spend at least part of their lives in the waters of the Bay |

## WHAT IS A WETLAND?

Wetlands are marshes or swamps that provide a home for many plants and animals such as frogs, egrets and turtles. Wetland areas are very important to the health of our waterways and the Chesapeake Bay because they improve water quality by filtering out excess nutrients and other pollutants.

# STATE SYMBOLS

## DID YOU KNOW?

Maryland's State flag is based on the "coats of arms" of British nobles.

The Baltimore oriole and checkerspot butterfly are State symbols that share orange and black coloring.

The diamondback terrapin is the State reptile, the white oak is our State tree and the black-eyed Susan is our State flower.

TODAY

Our State dog, the  
Chesapeake Bay retriever, is  
known for its hunting skills.

TODAY

The striped bass is  
the State fish, but the  
blue crab is the State  
crustacean.

The State boat is the  
Skipjack, a sailing ship  
used to dredge for  
oysters.

You probably drink our State beverage every day. It's milk!

# BAY GAME BINGO

## Here's how to play

When you see one of the items below, draw a circle around it.  
Complete a row across, up and down, or diagonally, or  
find everything on your card.

Fisherman

School Bus

TV Satellite

Bay License Plate

Water Tower

Crab

SUV

Seagull

House Construction

Marina

Grain Silo

Osprey

Maryland Flag

Cafe

Bridge

Produce Stand

Tractor

Scenic Route Sign

Park & Ride Sign

Farm

Power boat

Bait Shop

Cow

Litter

School

To learn more about these bingo items and how many of them connect  
to the Bay, visit the Maryland Bay Game website at  
[www.dnr.maryland.gov/baygame](http://www.dnr.maryland.gov/baygame)

# COOL CRITTERS

TODAY

## EXPLORE!

Visit a pond or stream near your house with an adult. Take a pad of paper to take notes and pretend to be a biologist.

Do you see dragonfly babies or other larvae? How about snails, leeches or worms? Is the water clear? What's on the bottom of the stream or pond? Are there rocks, gravel, sand or mud? What types of plants are nearby?

You have just created a stream profile, which helps us learn whether the water is clean and safe for critters and you!

Learn more at [www.streamhealth.maryland.gov](http://www.streamhealth.maryland.gov)

# KNOW YOUR SHELLFISH

Match the shellfish to its name.

B

TODAY

D

E

**EXPLORE!**

Look for these sea creatures when you're at the beach. You'll also find them on the menu at your favorite restaurant or seafood market!

Answers: Bay Scallop D, Blue Crab B, Horseshoe Crab C, Eastern Oyster E, Hard-shell Clam A

# EXPERIMENT WITH NATURE!

Dirt, rocks, sand and recycled stuff are great tools for nature experiments!

## MAKE A TOAD SHELTER

Turn a old clay pot, margarine tub, or any other durable container into a backyard observatory for little croakers. Coffee cans can also be used. Once you make sure there are no sharp edges you can paint the can any way you like using outdoor paint. Sealing it with acrylic spray will make it last longer.

Once your toad house is finished, find a moist and shady spot in your garden. Lay the pot on its side and bury half of it, filling the inside partially so visiting frogs or toads will be sitting on dirt.

## WATCH A BEAN GROW

Plants need water to live. They absorb water from the air through their leaves, and suck water up through their stems. To see beans grow, here is what you need: water, potting soil, clear plastic cups or glass jars and 3 beans.

- Fill the container with 2 inches of water and drop two beans in the cup of water.
- Leave the beans to soak overnight.
- The following day, drain the water from the cup and remove beans.
- Fill container half way with soil, place a bean inside, and fill with more soil.
- Place container in a well-lit and warm spot and be sure to water the beans every day.

Watch closely and you will see how quickly the plants grow - almost minute by minute!

# CAMPING FUN

Have you ever slept outdoors? Camping is fun for kids and adults, and Maryland State Parks are great places to camp with family, friends and scouts. AND you can enjoy every one of your outdoor rights while there! [Check them out at www.dnr.maryland.gov/publiclands](http://www.dnr.maryland.gov/publiclands)

## PLAY

Get wet and splash around in a lake or river. Canoe or

kayak. Look for

birds and wildlife. Go on a scavenger hunt.

Learn how to read maps and a compass.

Lie down on a blanket and watch the clouds go by or bring a star chart and find constellations.

On Saturday, June 26, you can join people across the county for the Great American Backyard Campout. From your balcony to your backyard to a State or national park, no site is too big or too small to spend a night sleeping under the stars. [Learn more at www.nwf.org](http://www.nwf.org)

TODAY

## PARK QUEST

Gather your family together for an outdoor adventure! Park Quest 2010 offers teams a chance to compete in 10 quests at 24 beautiful State Parks. Families can kayak, hike and bike and win prizes. [Learn more at www.dnr.maryland.gov/parkquest](http://www.dnr.maryland.gov/parkquest)

# BE COOL IN THE SHADE!

Trees are one of our most important natural resources. They cool the earth, clean the air, and protect our soil and waterways. In the past our state lost many trees due to population growth.

By 1906, 60% of the state's forests had been removed to make room for farms, towns and small cities. Maryland's state parks grew out of a desire to save forests for future generations.

Today with the help of caring citizens and kids like you, we have more trees being planted, providing healthier living for all!

TODAY & TOMORROW

## EXPLORE

Visit [www.trees.maryland.gov](http://www.trees.maryland.gov) to download a \$25 coupon toward the purchase of a tree to plant with your parents. You can also see the ecological and economic benefits of your tree, and register to win prizes!
